I am writing this email to state that I am opposed to the terms of the Microsoft Settlement as they are currently stated. One of the biggest objections that I have is the proposal that Microsoft be allowed to give away software to public schools as part of the terms of the settlement. This does not penalize them for past behavior. In fact it encourages them to continue this because this settlement then greatly expands their market share and ties more school systems into this operating system.

Thank you for listening to my comments.
